

(South West) Limited

Training UK Industry

Course Objectives for N107 Lorry Loader

It is envisaged that by the end of training the trainee operator will be able to answer questions on and perform the following:

- Have a basic understanding of the industry, the dangers of working in the industry and their responsibilities as an operator
- Have a working knowledge of the manufacturer handbook, other sources of information and legislation applicable to the type of machine being used
- Be able to identify and locate major components of the vehicle and loader crane and explain their functions
- Be able to locate and identify all operating controls and explain their function
- Conduct all pre-operational checks in accordance with manufacturer and legislative requirements
- Configure the vehicle and loader crane ready for travel
- Configure the machine for travel and manoeuvre it safely across varying terrain in open and confined spaces
- Conduct all necessary safety checks in the work area
- Manoeuvre the machine to the work area & correctly configure in readiness for carrying out lifting duties
- Correctly deploy the stabilizers according to stated manufacturer specification
- Comply with all rated capacity indicators or load moment indicators
- Identify weight and centre of gravity of loads to be used
- Carry out lifting operations using the full capabilities of the loader crane
- Position loads accurately at designated locations including onto and from the vehicle
- Identify, fit and remove various attachments & lifting accessories as appropriate
- Minimise load swing & ensure load security of the vehicle
- Carry out all end of shift and shut down procedures
