Course Objectives for N404 Safe Working at Height

It is envisaged that at the end of the course the learner will be able to answer questions on and perform the following:

- Have a basic understanding of the industry, the dangers of the industry and their responsibilities when working at height
- Be able to define height work and identify the hazards of work above ground level & outline the general requirements necessary to control them
- Be able to identify accident causation of working at height
- Have an appreciation of planning and organisation of working at height
- Set up exclusion Zone explaining actions required for emergency actions and identifying any overhead hazards
- Identify and maintain PPE appropriate for working at height
- Demonstrate working at height and explain all safety issues that could arise
